

TP368

Wi-Fi Thermostatic Radiator Actuator Valve

Smart Radiator Control

Voice Control with Alexa, Google Home , Google Assistance

Innovative design with simple and clear LCD display screen, the radiator thermostatic valve is powered by of AA batteries, with Great option to interlink with external slim wall Mounted Sensor to monitor and maintained indoor air temperature

The TRV is required Tuya Zigbee wireless hub to connect the valve and sensor to control through Alexa , Google assistance .

Technical Data

Power Supply	2*2 AA* 1.5V alkaline batteries
Accuracy	±0.5°C(accurate)
Working temperature Range of temperature display	0~70°C
Range of temperature adjustment	5~70°C
Probe sensor	NTC(10k)1%
Thread size	M30*1.5
Size	52*90mm
Maximum route	4.5mm
Running program	Set per 1 week as a cycle
Application	Radiator Thermostatic Valve
Connector Compatibility adapter	RA , RAVL, RAV
Certificate	CE,RoHS
Apps	 Smart RM
	 Smart Life
Voice Control	 Google assistance
	 Google assistance home
	 Alexa
