6. Voice Controls Operation

If you have any problems, please contact us at service@tuya.com

Tuya Smart offers the most comprehensive voice-controlled smart home experience with Alexa. Control your home lighting and other devices hands free. Just say it, Tuya Smart will obey.

Here's a step by step guide:

- (1). Download our "Tuya Smart" app in Google Play or iOS App Store;
- (2). Launch the app and register a new account (or login if you're already registered);
- (3). Turn on Tuya Smart devices and connect them with "Tuya Smart" app;
- (4). IMPORTANT: You can rename the devices with Tuya Smart App. So if you rename a smart bulb "Livingroom Light", then Echo will get that same name after discovered the devices in Step 9;
- (5). Download Amazon "Alexa" app from Amazon Market, Google Play or iOS App Store, and connect Echo with "Alexa" app;
- (6). Search the Alexa Skills directory for "Tuya Smart";
- (7). Click Enable skill of "Tuya Smart", then input your account username, password and region on the linking page;
- (8). Talk to Echo ""Alexa, discover devices.". Wait till Echo says "Discover is completed";
- (9). Now all setup is done. Try talk to Echo to control your devices.

Here are the voice commands Tuya Smart has for HY368 +RS:

"Alexa, set the [living room] temperature to 22 degrees
